FOR IMMEDIATE RELEASE

Marlow Explorer 58E

Snead Island, Florida –September 21, 2015 (Marlow Yachts Limited, Inc.)

Our Marlow Explorer 58E series replaced one of our most popular series—the 57E after a successful 12 year run that saw continuous improvement, providing for an unusually long and successful model run. The 57E series on the brokerage market has been a sought after model with outstanding, industry leading resale value. In fact today there is not a single one for sale worldwide. The 58E series features many upgrades in styling, engineering and features to continue the legacy including a radius transom that is very stylish and increases lazarette storage volume by approximately 30%.

Careful engineering has resulted in a 40% gain in fuel capacity compared to 57-1. The enhanced engine room volume and lazarette make cruising a delight, allowing greater range and more options as to the destination. With a waterline length of almost 55' her ride is superior to other vessels of similar overall length with significantly longer range at ocean crossing speeds or at fast cruise.

By our proprietary Full Stack Infusion© methods developed at Marlow Yachts we have made substantial value added improvements in performance, internal and external volume while keeping the distinctive and well recognized style we are known for.

Our 58E, hull #5, will be standing tall at the upcoming boat show. The fully climate controlled Command Bridge model, not only allows for a built in dining settee behind the twin Captain helm seats but also allows for the large built in dining area forward of the galley on the main deck. A three stateroom boat with distinguished maple wood and Burmese teak throughout, impeccably fitted as only Marlow can do. An outstanding example of fine joinery throughout, she needs to be placed on your 'must see' list at the show.

We welcome you to come experience the world of Marlow Yachts.....

Come see us at the Ft. Lauderdale Boat Show at the Bahia Mar Yachting Center, Dock BC, South Side of the show.
