## **FOR IMMEDIATE RELEASE**

### **Marlow Explorer 80E**

**Snead Island, Florida – January 11, 2019 (Marlow Yachts Limited, Inc.)**

Our Marlow Explorer 80E, features a specially designed flying bridge in addition to the Command Bridge to satisfy the requests of a highly experienced yachtsman whose normal cruising grounds stretch as far as the San Blas Islands and beyond. After many long hours of drawings and discussion with the bright minds at Marlow, we have produced a yacht in harmony with itself while maintaining her classic lines that are a trademark of all Marlow Explorers. Forward of the Command Bridge is the Sport Bridge designed as a superb sun lounge area for a large number of privileged guests.

Carrying 3900 gallons of fuel in proprietary tanks that allow a 97% fuel capacity burn in complete safety, this long ranger will, like her sisters, show her transom to the fleet in open water with top end speed of approximately 30 knots. She will leave most in her wake, your destination quickly reached or you may choose cruising at world girdling displacement speeds around the clock for 3000 miles nonstop without the long and slow roll periods that limit displacement cruisers to mind numbing pace.

Unparalleled specifications to the highest of classification societies and choice of materials that have no peer, installed after careful engineering and design review. In fact, we know of no other yacht of similar size and type that has achieved the exalted classification status from the most stringent world bodies that Marlow enjoys.

With medium load conditions, the initial trials proved this vessel to have outstanding performance. Her C-32 ACERT Caterpillar 1800 HP engines allowed a speed of 30 knots. There are no crowded spaces in this stunning model as every area is spacious, including the engine room, machinery spaces and crew accommodations.

*We look forward to welcoming you at our display at the Miami Boat Show on Pier 8 at the Miami Marine Stadium on Virginia Key.*
