FOR IMMEDIATE RELEASE

Marlow Explorer 66E

Snead Island, Florida – January 3, 2018 (Marlow Yachts Limited, Inc.)

The innovative and enormously successful Marlow Explorer 66E will be on display at the Miami International Boat Show in February on Virginia Key at the Miami Marine Stadium. She is a most remarkable, head turning yacht with new and exciting innovative features and layout from the Marlow Yachts team built in our environmentally green award winning factory. Featuring the nimble handling of a much smaller yacht, with performance at sea proven over and over, this new 66 excels dockside or in a remote cove, providing luxurious and practical surroundings at home on any sea or at any port of call.

The beautiful Oyster White hull with the Command Bridge feature allows many options for entertaining and dining throughout the yacht. The built in bow seating in the Portuguese Bridge allows a beautiful relaxing environment to view sunsets or soak up the sun. This is a three stateroom layout with an additional buddy bunk along with a crew cabin aft.

The additional beam increases volume throughout and increases stability at rest and underway. Her fuel tanks at 3000 gallons are by far leading in class, typically double the industry standard. The engine room is more spacious and is dedicated to engines with generators and other utilities in separate quarters aft. This vessel is capable as equipped from the factory to undertake voyages in distance and weather that few or none can match. West Palm Beach to Newfoundland non-stop causes no concern for this rugged but elegant passagemaker.

Our advanced manufacturing techniques and over a decade of experience of building Marlow Explorers from 49' to 97' has provided us the ability to continue offering our models that have revolutionized the industry, providing the seaworthiness, comfort and style Marlow owners expect.

We look forward to welcoming you at our display at the Miami Boat Show on Pier 8 at the Miami Marine Stadium on Virginia Key.
