

# Marlow Explorer 75E

4 staterooms & crew cruise @ up to 25 knots

"From the original concept through design, execution and delivery, the watchword for Marlow Yachts Limited, Inc., is to adhere to absolute top quality standards in design, material, installation and quality control." - **David Marlow**

Why compromise when you can have everything you want? The Marlow 75 gives you better range than a slow trawler while providing very fast passage making capabilities; with the ability to do 20+ knots for over 500 miles. All this capability while still offering you the flexibility to build the layout that suits your cruising style and personal tastes. Our own state of the art factory and proprietary manufacturing techniques let us provide this at a lower cost than any yachts in our class.
